Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

Notice to Applicant(s)

1. This action is responsive to the following communications: amendment filed on 1/13/05.
2. This application has been reconsidered. Claims 2, 3, 4, 6, 7, 8, 9, and 10 are pending.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 2, 3, 4, 6, 7, 8, 9, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Gase (U.S. 6,184,996).

With respect to claims 2, 4, 6, 7, and 8, Gase discloses a printer (14) connected to a network, comprising: a memory (26) for storing a program; a processor (32) for executing the program; and a print engine for executing printing on a print record medium (column 3, lines 24-30), wherein according to the program, the processor receives from a computer a print request (URL) (column 3, lines 6-23), including a request to a peripheral device to acquire print data (column 3, lines 6-30); sends the acquisition request to the peripheral (column 3, lines 13-23);

Art Unit: 2626

and causes the print engine to print on the basis of the print data sent from the peripheral device in response to the acquisition request (column 3, lines 24-30), wherein in response to a given transfer request sent from the computer, the processor sends page data, which composes a print acceptance screen for sending the print request, to the computer (column 3, lines 37-51).

With respect to claim 3, Gase discloses the acquisition request includes a specified condition for the peripheral device to acquire the print data (which reads on a URL) (column 3, lines 13-23).

With regard to claims 9 and 10, Gase discloses a printer (14) connected to a network, comprising: a memory (26) for storing a program; a processor (32) for executing the program; and a print engine for executing printing on a print record medium (column 3, lines 24-30), wherein according to the program, the processor sends page data, which composes a print acceptance screen for sending the print request, to the computer (column 3, lines 37-51) receives the print data that a peripheral device acquires and sends in response to a print request as the computer sends the print request to the peripheral device, the print request including a request to acquire the print data on the basis of the print acceptance screen (column 3, line 12 to column 4, line 64), and causes the print engine to print on the basis of the print data sent from the peripheral device in response to the acquisition request (column 3, lines 24-30).

Response to Arguments

4. Applicant's arguments filed 1/13/2005 have been fully considered but they are not persuasive. Applicant submits that Gase does not disclose that the printer sends page data to the

Art Unit: 2626

computer which includes a print acceptance screen to send the print request. The Examiner respectfully disagrees.

Gase discloses that the printer sends a home page (which reads on the print acceptance screen) to the computer (column 3, lines 37-41). The user that views queued jobs and sends print requests to the printer using the home page (acceptance screen) (column 3, lines 38-67).

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
